COMMENTS ON EXAMINER'S REASONS FOR ALLOWANCE

Applicant recognizes that in accordance with M.P.E.P. § 1302.14, the Examiner's reasons for allowance need not set forth all of the details as to why the claims are allowed. In the above-referenced application, Applicant does not concede that the Examiner's stated reasons for allowance are the only reasons for which the claims are allowable. In particular, Applicant does not concede that all of the identified limitations—i.e., "Consider claims 1, and 24, the best prior art found during the examination of the present application, Bugeja fails to disclose a switch circuit configured to switch the bias output from the LNA to the circuit when the LNA is powered down from the first mode to the power down mode.

Bugeja disclose a wireless transceiver, comprising: an amplifier configured to receive an input RF signal, the amplifier including a biasing system; the biasing system including a low noise amplifier (LNA) to amplify the input RF signal; (see figure 1A and col. 3 lines 22-24) a bias circuit configured to provide a bias output to the LNA during a time the LNA is operating in a first mode (col. 3 lines 20-21).

Bugeja fails to disclose a circuit configured to maintain the bias circuit in an operating state during a time the LNA is operating in a power down mode.

Attorney's Docket No.: 13361-062001 / MP0331

Piazza discloses a circuit configured to maintain the bias circuit in an operating state during a time the LNA is operating in a power down mode (par. 6, 10, and 25-31).

However, Piazza fails to disclose a switch circuit configured to switch the bias output from the main circuit to the circuit when the main circuit is powered down from the first mode to the power down mode.

Therefore, this limitation, in conjunction with the other limitations recited in claims 1 and 24 are novel and unobvious in view of Bugeja and in view of Piazza, and the prior art of record."—are included in each identified claims or necessary to distinguish over the prior art of record or to satisfy the requirements of 35 U.S.C. § 112. Furthermore, the claims may be patentable for other reasons. In addition, dependent claims 2-14, 16-21 and 23-28 are allowable on their own merits, and are allowable on the basis of a sub-combination of the recited features of the dependent claims and their respective base claims.

Please apply any additional charges or credits to our Deposit Account No. 06-1050.

Respectfully submitted,

Date:
